

## RaniShrinkFilm

The film is heavy duty shrink polyethylene commonly used to shrink-wrap boats for transportation and storage. The film can also be used to protect other large objects in extreme weather conditions.

The film contains UV-stabilizer to prevent UV rays to break down the film and 4 % EVA is added to keep the polyethylene soft and flexible in cold temperatures.

The film is placed over the object and heat shrunk with a heat gun to give a tight cover.

<b>400761</b>	1000/4000 x 0,18 mm - 75 m/roll
<b>400589</b>	1250/5000 x 0,18 mm - 60 m/roll
<b>400590</b>	1500/6000 x 0,18 mm - 50 m/roll

- approx. 50 kg/roll
- 16 rolls/pallet
- approx. 800 kg/pallet
